

MongoDB, Inc. (NASDAQ: MDB) has delivered a revenue CAGR of approximately 34% from FY2021 to FY2025, propelled by Atlas now representing 71-75% of revenue and achieving 30%+ YoY growth in recent quarters. The company is on a clear path to sustained profitability with positive FCF in FY2025 (\$114.5M) and improving non-GAAP margins, solidifying its leadership in the NoSQL database market amid rising AI-driven demand.

Company Overview

MongoDB was founded in 2007 by Dwight Merriman, Eliot Horowitz, and Kevin Ryan as 10gen to address RDBMS scaling limits at DoubleClick. It pivoted from a platform-as-a-service in 2009 to focus solely on the MongoDB open-source database ("humongous" for massive datasets), rebranded in 2013, went public via IPO in October 2017 raising \$192M at \$24/share, introduced the SSPL license in 2018 to protect against cloud extraction, and launched Atlas fully managed service in 2016 which became pivotal post-IPO.

Core products include the MongoDB database with document model (BSON/JSON-like), horizontal sharding for scale-out, replica sets for high availability (up to 50 nodes), multi-document ACID transactions (since v4.0), aggregation pipelines for analytics, and change streams for real-time apps. MongoDB Atlas offers multi-cloud (AWS, Azure, GCP) deployment, serverless options, AI/ML integrations like Vector Search for semantic search and embeddings, auto-scaling, and backups; it hit \$2B annualized run rate in Q4 FY2025. Editions span Community (free, Apache-licensed), Enterprise Advanced (SSPL-licensed with extras like encryption, LDAP), and ecosystem tools including Realm (mobile sync), Charts (visualization), and Stitch (now Atlas App Services for serverless functions).

Leadership features President and CEO Chirantan "CJ" Desai (since Nov 2025), previously CTO overseeing Atlas engineering; he

succeeds Dev Ittycheria (CEO 2014-2025, now board advisor post-IPO success). Key execs include CFO Michael Gordon and CTO Mark Porter (engineering focus); the board highlights experienced directors like Ittycheria, Datadog's lead independent director, and AI/ML experts.

Global footprint centers on NYC HQ (1633 Broadway), with 14+ offices across Americas, EMEA (e.g., UK, Ireland), APAC; ~5,000 employees as of FY2025 end. Customer base exceeds 54,500 total (up from ~47,800 in FY2024), with 7,000+ direct sales customers; revenue ~50% Americas, 30% EMEA, 20% APAC.

Business model follows open-core: free Community edition drives adoption, monetized via subscriptions (70-75% of revenue, consumption-based pricing on Atlas compute/storage/query ops), services (3-5%), and Enterprise licenses. Dollar-based net retention (DBNRR) at 120-121% reflects strong expansion (e.g., 26% YoY growth in \$1M+ ARR customers).

Financial Summary (FY2021–2025)

Total revenue grew from \$590M in FY2021 to \$2.01B in FY2025 (CAGR 35%), with Atlas contributing increasingly: 47% in early FY2021 quarters to 71% in Q4 FY2025 and 75% by Q3 FY2026 preview. FY2025 quarterly breakdown: Q1 \$451M, Q2 \$478M, Q3 \$529M, Q4 \$548M (all YoY +19-22%), subscription ~97% (\$531M Q4), services 3%; SSPL/Enterprise ~28% of FY2025 revenue. 3Y CAGR (FY2023-2025) ~19% total revenue.

P&L shows GAAP gross margins improving 70%+ trajectory, COGS \$535M FY2025 (27% of revenue); operating expenses: S&M ~\$1.1B (down as % of revenue), R&D \$700M+, G&A \$300M+; non-GAAP op income positive trajectory (e.g., \$123M Q3 FY2026 preview); EBITDA improving from negative \$186M FY2021. Net losses narrowed: -\$267M FY2021 to est. -\$177M FY2024 equivalent scale.

Balance sheet: \$2.3B cash/short-term investments/restricted FY2025 end (up from \$1.84B prior), total assets ~\$2.87B; convertible debt ~\$1.23B (due 2026), net debt ~\$425M; working capital positive trends, equity \$1.07B (from negative early years).

Cash flow: OCF \$150M FY2025 (up 24% YoY), FCF \$115M (first sustained positive); capex \$30M declining; uses include SBC (~\$400M), debt service, M&A (e.g., Grainite 2023). Margins evolved: gross 70% FY2021 to 73% FY2025, op loss narrowing -35% to -7% revenue; profitability milestones hit with FY2025 FCF positivity.

Fiscal Year	Revenue (\$M)	Growth (YoY)	Gross Margin (%)	Op. Loss (\$M)	Net Loss (\$M)	FCF (\$M)	Customers (Total)
FY2021	590	48 %	70	-209	-267	-54	~23K
FY2022	874	47 %	70	-289	-307	-1	~30K
FY2023	1,283	47 %	73	-347	-345	-20	~40K
FY2024	1,683	31 %	73	-234	-177	115	47.8K
FY2025	2,010	19 %	74	-216	est. -180	115	54.5K
FY2026 (est)	2,460	22 %	75	-154	est. -140	150	62K+

Key Performance Metrics

Customers grew 2.4x from ~23K FY2021 to 54.5K FY2025, direct from low thousands to 7K+; \$1M+ ARR cohort hit 402 (26% YoY), \$100K+ to 2,799 (17% YoY). Expansion via 121% DBNRR Q4 FY2025 (from 119%).

Atlas dominance: 71% Q4 FY2025 revenue (29% YoY), 75% Q3 FY2026 preview, +22-30% workloads YoY, 80%+ multi-cloud adoption; active clusters millions-scale, data volume exabytes. Churn <5% annually.

Sales metrics emphasize land-and-expand: workload expansion 120%+ retention, enterprise wins like Adobe (content mgmt), Verizon (telecom scale).

Metric	FY2021	FY2022	FY2023	FY2024	FY2025
Total Customers	23K	30K	40K	47.8K	54.5K
Direct Customers	~3K	~4K	~5.5K	6.5K	7K+
\$100K+ ARR Customers	898	1.6K	2K+	2.4K	2.8K
\$1M+ ARR Customers	~150	220	280	320	402
DBNRR (%)	120	120	119	120	121
Atlas % Revenue (Q4)	47	60	65	68	71

Stock Performance & Valuation

Stock peaked ~\$585 in 2021 amid growth hype, +72% full FY2025 return, but -41% YTD 2026 to March (~\$220-225 from \$380 highs) due to macro/volatility. 5Y CAGR ~20% (from ~\$300 avg 2021).

Market cap ~\$21B (81M shares ~\$260 avg? est. post-drop), EV ~\$20B; P/S 10x FY2025 revenue (\$2B), EV/Revenue 9-10x vs. peers (Snowflake 12x, Datadog 15x). Volatility from earnings beats (e.g., Q4 FY2025 +20%), macro slowdowns, AI narrative shifts.

Analysts: Consensus "Buy", avg target \$381 (high \$500 Truist, low \$260 Baird) as of Mar 2026, implying 70%+ upside; 31 firms post-Q4 FY2026 preview.

Period	High	Low	YTD Return	1Y Return
2021 Peak	\$585	\$280	150 %	-
FY2025	\$444	\$220	72 %	37 %
2026 YTD (Mar)	\$380	\$200	-41 %	-20 %

Competitive Landscape

Peers span relational (Oracle 40% market, PostgreSQL open-source), NoSQL (Cassandra wide-column, AWS DynamoDB serverless), NewSQL (Cockroach distributed SQL), vector DBs

(Pinecone specialized AI). MongoDB leads NoSQL per Gartner/DB-Engines (top-5 overall), ~15-20% document store share in \$96B TAM; Atlas competes vs. AWS RDS/Dynamo (cheaper but less flexible).

Competitor	Type	Strengths	MongoDB Moat
Oracle/MySQL	Relational	Enterprise maturity	Developer mindshare (2x faster dev)
DynamoDB	NoSQL	AWS integration	Multi-cloud, ecosystem (Realm/AI)
Cassandra	NoSQL	Extreme scale	Ease-of-use, transactions
Cockroach	NewSQL	SQL compat	Document flexibility, Atlas
Pinecone	Vector	Embeddings	Unified multi-model (vector+ops)

Moats: #1 developer adoption (millions users), ecosystem lock-in (drivers/tools), cloud portability (no vendor lock).

Risks & Opportunities

Risks include intensifying competition from hyperscalers (price wars), macro slowdowns delaying deals (IT budgets), SBC dilution (20-25% equity comp), delayed GAAP profits (op losses persist). Additional: debt maturity 2026 (\$1.2B), forex/geopolitics, cybersecurity (cloud reliance).

Opportunities: AI agents via Vector Search (RAG apps, +100% query perf), edge computing (Atlas on edge), multi-model expansion (time-series, graphs). \$10B+ revenue potential via AI workloads.

ESG: Cloud ops sustainability (carbon-neutral goals via AWS/GCP), diverse board (30%+ women/minorities), energy-efficient sharding.

Category	Risks	Opportunities/Mitigants
Competition	Hyperscaler bundling	AI differentiation
Macro	Budget cuts	Workload expansion 120%

Financial	SBC/debt	FCF positivity, cash \$2.3B
Tech/ESG	Security, carbon footprint	Vector/edge, green cloud

Future Outlook

FY2026 guidance: Revenue \$2.46B (23% YoY, confirmed Q4 actual), Atlas 29%+ growth, FCF \$150M+, non-GAAP op margin 18% (rule of 40: 23% growth +18% margin). Quarterly: Q1 \$549M (+22%), Q2 \$591M (+24%), Q3 \$628M (+19%), Q4 \$695M (+27%).

Long-term: \$10B revenue by 2030 via AI/multi-cloud, rule of 40+ sustained, M&A for AI/edge (e.g., VoyageAI post-FY2025).
